

Premier Gate Automation

Trusted Automation and Security Brands We Specify and Install

Premier Gate Automation specifies carefully selected automation, access control and security brands for electric gates and perimeter security systems across Essex, London and the South East.

Manufacturer selection is treated as a technical decision, not a marketing exercise.

Our Approach to Product Specification

Every component is specified according to site requirements, duty cycle, environmental exposure and compliance considerations. We prioritise reliability, safety, integration and long-term manufacturer support.

Why Manufacturer Selection Matters

Electric gates are safety-critical systems. Choosing established manufacturers improves reliability, compliance, maintainability and long-term availability of parts.

How We Select Manufacturers

- Technical suitability
- Duty cycle and expected usage
- Environmental exposure
- Safety certification
- Manufacturer support
- Integration with wider access control systems

FAAC

Globally recognised automation systems, barriers and traffic control solutions for residential, commercial and industrial applications.

BFT

Advanced automation, access control and integrated safety technologies.

SEIP

German engineered automation for gates, garage doors and industrial doors.

Hörmann

Premium residential and industrial doors and entrance systems.

Hikvision

Video intercom and security technologies for controlled visitor access.

Paxton

UK manufacturer of electronic access control solutions.

Telguard

GSM-based access control and remote monitoring systems.

Integrated System Design

We design complete systems that integrate automation, access control, intercoms and security technologies into a cohesive, compliant solution.

Specification Support for Architects and Developers

We work alongside architects, consultants and developers to provide early-stage technical guidance, manufacturer recommendations and compliant system design.

Speak to Our Team

If you are planning a new installation or upgrade, our team can advise on the most appropriate manufacturers and system architecture for your property or site.
